■Order/Quotation

□ Temperature Power Sensor series   □ Electronic Thermostat series
□ High Temperature Thermostat series   □ Disk type Thermostat series
□ Other Products

1. Model :   2. Quantity :

3. Operation Temperature/Setting Tolerance :

4. Differential :

5. Contacts configuration [X, Y, $\overline{X}$, $\overline{Y}$] :

6. Load capacity and its types :

7. Change rate of ambient temperature, wind speed :

8. Operating voltage : AC   V,   DC   V

9. Details of your application, purpose and conditions :

If you do not have a clear specification for a thermostat, you can simply inform us of your application, let's say, for example, that the contacts will open at temperature 35 Celsius when temperature rises and close at temperature 30 Celsius when temperature falls.
